

Risk assessment

Name of activity, event, and location	Crate Stacking – Activity Tower – Kinver Scout Camp	Date of risk assessment	26/10/2021	Name of person doing this risk assessment	Megan Williams – Operations Manager
		Date of next review	01/04/2022		

What hazard have you identified? What are the risks from it?	Who is at risk?	How are the risks already controlled? What extra controls are needed?	What has changed that needs to be thought about and controlled?
Adverse weather – Lightning, high winds or poor lighting	All	<ul style="list-style-type: none"> The activity will be ended. All instructors and participants to be vacated from the activity area immediately. 	
Unauthorised access – Fall from height, damage to the equipment	All	<ul style="list-style-type: none"> Activity area to be fenced and locked when not in use. Groups to be briefed not to enter the activity area unless instructed. 	
Incorrect belay set up – Fall from height	Participants	<ul style="list-style-type: none"> All instructors must hold current a Scout permit or NGB suitable for the activity. Proof of this must be provided before the activity date. All instructors must have completed a competency check with an authorised member of the campsite team and have read and understood the campsites activity operating instructions. Instructors to check belay set up and anchor points before use. 	
Incorrectly fitted helmet – head injury, falling objects	All	<ul style="list-style-type: none"> Only helmets designed for climbing to be worn. Helmets must be worn correctly as per the manufacturers guidelines by all persons within the designated activity area. Instructors must check helmets before beginning the activity. Signs to indicate use of helmets. Participants who wear a full turban are exempt from wearing a helmet, as the turban should control sufficiently the risks that the helmet would otherwise guard against. This exemption does not apply to participants who are wearing a

Risk assessment

		<p>'patka' or lighter cloth head covering, with or without a top-knot. These individuals must wear a helmet, and provision should be made for a private area where these participants can remove or adjust their patka in order to fit the helmet.</p> <ul style="list-style-type: none"> • Where a turban is worn in place of a helmet, special care must be taken to ensure that there is no risk of any loose cloth getting entangled in equipment or apparatus. • Instructor to verbally check if any participants has objects in their pockets and ask for them to be removed before going on the stack. 	
Incorrectly fitted harness – Fall from height	All	<ul style="list-style-type: none"> • Harnesses must be worn correctly as per the manufacturers guidelines by all persons taking part in the activity. • Instructors must check harnesses before beginning the activity. • Instructors to re-check harnesses immediately prior to any participant going on the stack. • Chest harnesses must be worn when inversion is likely i.e: <ul style="list-style-type: none"> - The participant has a fairly prominent upper body/stomach and no hip definition - There is a medical reason that suggests the participant may faint/collapse • If there is a risk of inversion by the participant but they are too small for a standard harnesses, a full body harness must be used. 	
Unsecure attachment to safety rope – Fall from height	All	<ul style="list-style-type: none"> • Use of the safety rope is mandatory. • Instructors should use the ground anchor as appropriate. • The safety rope must be connected to the participants harness through the belay loop using a double figure of eight knot. Use of clipping in with a screwgate karabiner and a double figure of eight knot is acceptable. • A stopper knot must be used after tying a double figure of eight knot. • The instructor must do a visual and verbal check when attaching the climbing safety rope.

Risk assessment

		<ul style="list-style-type: none"> Participants should not get on the stack until instructed to do so by the instructor. 	
Stacking the crates – Head injury, collisions, slips, trips and falls	All	<ul style="list-style-type: none"> The activity area should be inspected by the instructor before use to ensure the area is clear of debris. Participants must be briefed as to when they may enter the activity area. Only 5 people allowed into the activity area at one time: <ul style="list-style-type: none"> 1 belayer (+1 if the instructor is not belaying but is supervising the belayer). 1 participant on the stack. 3 participants to stack the crates. The stack should be placed on the allocated concrete pad and so that it is likely to fall to the sides of the activity area. Participants to be briefed on the most effective way to stack the crates: Participants on the ground must not stand on other crates to pass them up. Participants on the ground must not hold the stack. Participants on the ground must be aware of what is happening at all times and should not face away from the stack. If the participants on the ground cannot reach the participant on the stack, they may throw crates up but must ensure that the participant on the stack is ready and must not try to catch the crates if they fall back down. Crates should be cleared to the side when not in use or after the stack has fallen to create a clear area for the participant to be lowered down. 	
Appropriate clothing – General injuries, entrapment	All	<ul style="list-style-type: none"> Brief and check participants have completed the following: <ul style="list-style-type: none"> Long hair tied back or secured. Large or dangly jewelry removed. Loose or baggy clothing tucked in and secured. Instructors must check themselves for the above also.

Risk assessment

		<ul style="list-style-type: none"> Suitable footwear must be worn. No open toed or slip-off shoes. 	
Equipment Failure – Fall from height		<ul style="list-style-type: none"> All equipment to be checked before every use. All equipment to be checked and documented regularly by the campsite management team, as advised by the manufacturer. Any equipment deemed not suitable for use should be removed from the activity area and reported to the camp warden to be documented, destroyed and disposed of. All equipment must be kept in suitable, secure storage when not in use. 	
Group Management – General injuries, not following instructions	All	<ul style="list-style-type: none"> The instructor must fully brief all participants before beginning the activity. All groups that include young people must be supervised by an appropriate adult whilst waiting to take part in the activity. Spectators and participants waiting for their turn must remain outside of the activity area until told otherwise. Groups should be aware of the recommended group size and time allocated to the activity session. All participants and group leaders must adhere to the instructor's instructions at all time. Failure to follow instructions and/or safety concerns will result in the instructor ending the session. The instructor must stop the session and report to the camp warden if there is an accident or near miss. Instructors may end the session if they feel that the activity is not suitable for the age/ability/experience of the participants. 	
COVID-19	All	<ul style="list-style-type: none"> Hands to be sanitised before putting on or removing harnesses and helmets. Hand sanitiser will be available throughout the activity session. Clipping in the safety rope is acceptable to minimise contact (please see above for approved method of clipping in).
