Data Privacy Management Procedure for Hereford and Worcester County Scouts

Issue 1: March 2018

About this procedure

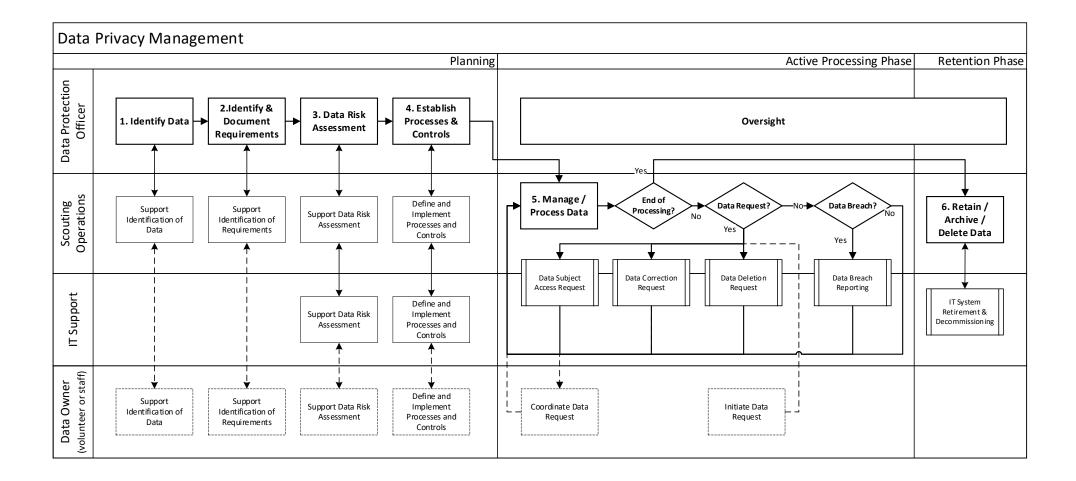

This procedure defines how Hereford and Worcester County Scouts will manage personal data to assure appropriate data privacy in accordance with the UK Data Protection Bill 2017. It should be read in conjunction with current information and guidance published by the UK Information Commissioner's Office (ICO – http://ico.org.uk/)

Note that once the UK leaves the European Union, additional requirements of the European Union General Data Protection Regulation (GDPR) (Regulation (EU) 2016/679) may continue to apply with respect to data processed relating to EU citizens, which may include some youth members and volunteers. As Hereford and Worcester County Scouts does not regularly process data relating to citizens of the EU as a matter of course, it is considered that the UK Data Protection Bill 2017 will meet the requirements of the EU GDPR regulation. Should this position change this procedure will be reviewed.

The general requirements for data protection are defined in the Hereford and Worcester County Scouts Data Protection Policy.

The general process for assuring data privacy is shown overleaf. This is supplemented by four additional procedures:

- Subject Data Access Request Procedure
- Subject Data Correction Request Procedure
- Subject Data Deletion Request Procedure
- Subject Data Breach Reporting Procedure

This process is described in more detail below

Step		Description			
1.	Identify Data	The Data Protection Officer is responsible for identifying all personal data, supported by the appropriate Responsible Officer (data owner) and other appropriate volunteers in Hereford and Worcester County Scouts. For each set of personal data processed, the Hereford and Worcester County Scouts data protection policy defines: • The data description • The personal data included • How and where data is stored • The data retention policy			
		The Responsible Officer (data owner)			
		Where new data sets or changes to datasets (including data no longer held) are identified, the data protection policy should be updated to reflect the changes and steps 2 – 4 (and possibly step 6) repeated for the dataset			
2.	Identify and Document Requirements	For all personal data, the Data Protection Officer is responsible for identifying data protection and data privacy requirements, supported by the appropriate Responsible Officer (data owner) and other appropriate volunteers. These are generally based on the requirements derived from the UK Data Protection Act 2017. Where changes to personal datasets are identified (step 1 above) additional data protection/privacy requirements may be identified to comply with applicable jurisdictional requirements. Any additional such requirements should be documented.			
3.	Data Risk Assessment	The Data Protection Officer is responsible for ensuring that data privacy risks are identified, supported by the appropriate Responsible Officer (data owner) and appropriate Hereford and Worcester County Scouts volunteers and/or officers. Based upon the data identified in step 1 above and the requirements identified in step 2 above, data privacy risk assessments should be conducted to identify applicable processes and controls. Hereford and Worcester County Scouts has determined that a general privacy impact assessment is required. This is documented in annex 1 below and general processes and controls have been considered to mitigate the risks identified in this generic privacy impact assessment. Such processes and controls have been developed in consideration of the general privacy impact assessment and implement established data protection / privacy good practices. It is not considered necessary to document detailed risk assessments where such good practices are followed. Specific risk assessments (in the form of data, system or platform specific privacy impact assessments) may be conducted and documented for specific data privacy requirements. See ICO guidance for examples of suitable data privacy impact assessments.			
4.	Establish Process and Controls	General data protection principles and controls are defined in the Hereford and Worcester County Scouts data protection policy. General data privacy process and controls are defined in the following procedures: • Subject Data Access Request Procedure • Subject Data Correction Request Procedure • Subject Data Deletion Request Procedure • Subject Data Breach Reporting Procedure			

Step	Description			
	Where changes to personal datasets are identified (step 1 above), and/or where specific data privacy impact assessments are conducted the applicability of these general requirements, processes and controls should be reviewed to ensure that they are fully applicable.			
	Where existing requirements, processes and controls are considered insufficient to assure data protection/privacy one of the following must occur:			
	 Update processes and controls to include new requirements and mitigate risks Implement specific (additional or alternative) processes and controls to meet specific requirements and mitigate specific risks 			
5. Manage / Process Data	Data processing will take place following defined processes and established practices and in accordance with the data protection measures defined in the Hereford and Worcester County Scouts data protection policy.			
	Any specific data privacy management actions will be conducted in accordance with the following procedures:			
	Subject Data Access Request Procedure			
	Subject Data Correction Request Procedure			
	Subject Data Deletion Request Procedure			
	Subject Data Breach Reporting Procedure			
	In addition, the following rights must be respected:			
	Right to Object			
	Individuals should be informed of their right to object to data processing at the first point of communication i.e. the first email they receive, available on their first visit to a website etc. Individuals may object to:			
	 Processing based on legitimate interests or the performance of a task in the public interest/exercise of official authority (including profiling); Direct marketing (including profiling) e.g. Moor House Adventure Centre mailings 			
	Processing for purposes of scientific/historical research and statistics.			
	In these cases, processing must cease unless the Hereford and Worcester County Scouts can demonstrate			
	Compelling legitimate grounds for the processing, which override the interests, rights and freedoms of the individual (e.g. safeguarding of young people or compliance of other regulatory requirements)			
	the processing is for the establishment, exercise or defence of legal claims			
	Objections to direct marketing must be acted upon immediately			
	Right to Restrict Processing			
	Process should be halted when a data subject as a legitimate right to block processing. During this 'block', data may be stored but not processed. Sufficient data should be retained to identify the block. This is applicable when:			
	An individual contests the accuracy of the personal data, processing should be restricted until we have verified the accuracy of the personal data.			

restricted until we have verified the accuracy of the personal data.

Step	Description		
	 An individual has objected to the processing (where it was necessary for the performance of a public interest task or purpose of legitimate interests), and we are considering whether Hereford and Worcester County Scouts's legitimate grounds override those of the individual. When processing is unlawful and the individual opposes erasure and requests restriction instead. If the Hereford and Worcester County Scouts no longer need the personal data but the individual requires the data to establish, exercise or defend a legal claim. 		
	Right to Data Portability Data subjects may request a copy of their personal data portability when:		
	 They have provided to their personal data to the Hereford and Worcester County Scouts; The processing is based on the individual's consent (or for the performance of a 		
	contract); and when processing is carried out by automated means.		
	when processing is curried out by automated means.		
	Data should then be provided to the data subject (or transmitted to another data controller) in an open format e.gcsv file, .txt file etc, without undue delay and within one month, unless the data is considered complex (see Annex 2)		
6. Retain / Archive /	Following the ending of active processing a decision will be made to either retain, archive or delete data as follows:		
Delete Data	 Retain data: For cases where data is no longer being actively updated, changed or added to, but which still needs to be referred to on a regular basis. Where this is the case, access controls and permissions should be updated to make data 'read only' where possible Archive data: For cases where data is no longer being actively updated, changed or added to, and which does not need to be referred to on a regular 		
	 basis (i.e. may be retained for statutory purposes, risk mitigation purposes etc). Where this is the case, access controls and permissions should be updated to make data 'read only' where possible and the data should be moved to a suitable secure hard copy of electronic archive Delete data: For cases where data no longer needs to be retained 		
	When considering the above it should recognised that data may progress through a natural life cycle (active processing → retained → archived → deleted), possibly bypassing these steps. Data should not be retained beyond the retention period defined in the Hereford and Worcester County Scouts data retention policy		

Annex 1 – General Data Privacy Impact Assessment

Hereford and Worcester County Scouts has determined the need for a Data Privacy Impact Assessment (PIA). This is because Hereford and Worcester County Scouts:

- Collects new information about individuals, including data of a kind particularly likely to raise privacy
 concerns or expectations e.g. health records, criminal record checks or other information that people
 would consider to be private.
- Requires individuals to provide information about themselves
- May use information about individuals for a purpose it is not currently used for, or in a way it is not currently used
- Discloses information to third parties (legal and natural persons) who are part of the Scout Association or other statutory bodies, where there is a need to disclose such information to assure the safety or safeguarding of our members, staff or members of the public, or to manage complaints.
- May take action against individuals based on personal data, which may have an impact in their employment or appointment status

Hereford and Worcester County Scouts does NOT

- Collect information about or contact individuals in ways that they may find intrusive
- Disclose any other personal information to organisations or people other than as described above
- Use technology that might be perceived as being privacy intrusive e.g. the use of biometrics or facial recognition.
- Take action against individuals in ways that can have a significant impact on them, other than as described above

As a result of the above, the general data privacy risk assessment has been conducted:

Privacy Issue	Risks to Individuals	Compliance Risk	Associated
			organisational risk
Data inaccuracy	Right to be informed	Inability to comply with	Financial penalties
	Right of access	applicable requirements	Other enforcement
	Right to rectification	of UK Data Protection Act	actions
	Right to object	2017 (and EU GDPR)	Reputational risk
	Right to data portability	Inability to comply with	
	Right to erase	Policy, Organisation and	
	Right to restrict processing	Rules of the Scout	
Data breach	Data confidentiality	Association	
Data destruction	Right of access		
	Right to object		
	Right to data portability		
	Right to erase		
Data retention and	Right to restrict processing		
processing beyond			
defined period			

In seeking to mitigate such risks, specific controls have been identified and documented in the county data protection policy.

Annex 2 – Complex Data Portability Requests

Hereford and Worcester County Scouts considers the following data subject portability requests to be complex. Where this is the case, acknowledgement of the request should be provided to the data subject within 30 days of receiving the request and the data should be provided to the data subject (or an alternative data controller) as soon as possible, and always within 90 days of receiving the request.

- Any request involving multiple data stores from within the Hereford and Worcester County Scouts
 Office 365 environment (e.g. email accounts, OneDrive folders, SharePoint sites [lists, folders,
 databases])
- Any request involving a Hereford and Worcester County Scouts Office 365 data store and any other system (e.g. Cinolla CRM system, Compass membership database etc)
- Any request involving data held by Hereford and Worcester County Scouts volunteers in personal (secure) storage locations

All other such requests are considered simple and the data should be made available or transferred within 30 days of receiving the request.

If in doubt, the Data Protection Officer, balancing the rights of the data subject and the ability of the Hereford and Worcester County Scouts to transfer the data, will provide a definitive determination of whether a data transfer request is considered simple or complex.
